

Aaron Carlton Charles

Aaron Carlton Charles came into the Private Industry Training Dept on December 15, 1999, after being released from California Youth Authority where he resided for 2 1/2 years.

Aaron's goal was to obtain a job as soon as possible to support himself and his family. As he was going through the preemployment workshop, participating in mock interviews, his confidence visibly increased, and he began to submit applications for work.

While awaiting the results of his applications, Aaron was placed on a work experience activity through PITD. Shortly thereafter, Aaron was hired by Sutter Merced Medical Center, and has been working there since. He now has a small child, and he and his family have moved into a new apartment.
